

# Guiding nozzles

The enz® golden jet guiding nozzles were developed specifically for targeted cleaning of pipe inlets. They are used in searching for connections in ground lines and can thus prevent the need for cleaning via a household connection, for example. Entrance into the connection is made using a head nozzle on a flexible hose. The guiding nozzles are available with and without vibration.

## Applications

- Removal of hard deposits in PE, steel and concrete pipes, such as trickle lines

## Guiding nozzles

### Guiding nozzles

	17.044AS-001	17.040A-001
	1/2	1/2
	3 - 6	3 - 6
	10.5	10.5
	4 x M4	4 x M6
	3 x M6	3 x M6
	—	—
	1.7 x 10.5	1.5 x 10.4
	1.54	1.45
